

CONTENTS

5.1	BICYCLE DESIGN FOCUS	1
5.1.1	Design Integration	1
5.1.2	Design Users: People Riding Bicycles	2
5.1.2.1	Design Vehicle Analogy	2
5.1.2.2	Types of Bicycle Riders	2
5.1.2.3	Design User Group	4
5.1.3	Human Factors: Motivations and Deterrents To Bicycling	5
5.1.4	Application of Design Domain	5
5.2	BICYCLE DESIGN NEEDS	6
5.2.1	Design Vehicle	6
5.2.2	Operating Space / Dimensions	6
5.2.2.1	Cyclists	6
5.2.2.2	In-line Skaters	7
5.2.3	Safety and Security	8
5.2.3.1	Safety: Reducing Collisions with Cyclists	8
5.2.3.2	Security: Preventing Crime	9
5.2.4	Speed and Momentum	9
5.2.5	Connectivity and Directness	10
5.2.6	All-Season Surface Quality	10
5.3	BIKEWAY FACILITY TYPES	10
5.3.1	Separated Bikeways	11
5.3.1.1	Buffered and Unbuffered Bike Lanes	11
5.3.1.2	Protected Bike Lanes	14
5.3.1.3	Bike Paths	18
5.3.1.4	Multi-Use Paths	19
5.3.2	Unseparated Bikeways	22
5.3.2.1	Bicycle Boulevards	22
5.3.2.2	Shared Roadways	25
5.3.2.3	Shared Lanes	27
5.3.2.4	Advisory Bike Lanes	29
5.3.2.5	Bicycle Accessible Shoulders	30

5.4	BIKEWAY FACILITY SELECTION	32
5.4.1	Facility Selection Framework.....	32
5.4.1.1	Motor Vehicle Speeds of 0 to 30 km/h.....	34
5.4.1.2	Motor Vehicle Speeds of 30 to 50 km/h.....	34
5.4.1.3	Motor Vehicle Speeds of 50 to 80 km/h.....	35
5.4.1.4	Motor Vehicle Speeds over 80 km/h	35
5.4.2	Context Considerations and Trade-Offs	35
5.5	BICYCLE DESIGN: ALIGNMENT AND RELATED ELEMENTS	35
5.5.1	Design Speed	36
5.5.2	Stopping Sight Distance	36
5.5.3	Horizontal Alignment.....	37
5.5.3.1	Radius and Superelevation	38
5.5.3.2	Lateral Clearance on Horizontal Curves.....	38
5.5.4	Vertical Alignment	40
5.5.4.1	Grades	40
5.5.4.2	Crest Curves	41
5.5.4.3	Sag Curves.....	42
5.5.5	Horizontal Clearance	43
5.5.6	Vertical Clearance.....	44
5.5.7	Cross-Slope	44
5.6	BICYCLE DESIGN: INTERSECTION ELEMENTS	44
5.6.1	Bike Lanes at Roadway Intersections	45
5.6.1.1	Continuous Bike Lane without Right Turn Lane.....	45
5.6.1.2	Continuous Bike Lane with Right Turn Lane	47
5.6.1.3	Discontinuous Bike Lane (Shared Lane).....	48
5.6.1.4	Bike Ramp to Bike Path.....	49
5.6.1.5	Left Turn Considerations.....	51
5.6.2	Protected Bike Lanes at Roadway Intersections	51
5.6.2.1	Protected Bicycle Signal Phase	51
5.6.2.2	Discontinuous Lane / Mixing Zone (Shared Lane)	52
5.6.2.3	Protected Intersections	53
5.6.2.4	Left Turn Considerations.....	54
5.6.3	Bike Paths and Multi-Use Paths	54
5.6.3.1	At Roadway Intersections	54
5.6.3.2	At Mid-Block Crossings	56
5.6.4	Bicycle Boulevards at Roadway Intersections	59
5.6.5	Bike Boxes.....	59

5.6.6	Two-Stage Left-Turn Queue Box	60
5.6.7	Bikeway Facilities at On/Off Ramps	62
5.6.7.1	Lower-Speed Roadway (50 km/h or less) On/Off Ramps	62
5.6.7.2	Higher-Speed Roadway (>50 km/h) On/Off Ramps.....	63
5.6.7.3	At On-Ramps (Entrance Ramps)	64
5.6.7.4	At Off-Ramps (Exit Ramps).....	64
5.6.8	Bikeway Facilities at Roundabouts.....	65
5.6.9	Bikeway Facilities at Railway and Streetcar Crossings	66
5.6.10	Grade-Separated Bikeway Crossings.....	67
5.7	BICYCLE DESIGN: OTHER ELEMENTS AND DETAILS.....	67
5.7.1	Traffic Control Devices	67
5.7.1.1	Pavement Markings and Signs.....	68
5.7.1.2	Types of Signs.....	68
5.7.1.3	Bicycle Signals	68
5.7.2	Lighting	69
5.7.3	Bike Ramps	69
5.7.4	Bikeway Facilities at Transit Stops.....	71
5.7.5	Protected Bike Lane Delineators	72
5.7.6	Bikeway Facilities at Bridges or Tunnels.....	75
5.7.7	Dual Bike Lane (Passing Area)	75
5.7.8	Bikeway Facilities in Rural Areas	76
5.7.8.1	Lighting.....	76
5.7.8.2	Towns and Villages.....	76
5.7.9	Bicycle Parking.....	76
5.7.10	All-Season Bikeway Maintenance	77
