

TABLE OF CONTENTS

1. INTRODUCTION.....	1
1.1. Purpose of the Report	1
1.2. Pothole Origin and Formation	1
1.2.1. Public Expectations	4
1.2.2. Agency Expectations	5
1.3. Organization of the Report	6
1.4. Methodology	7
2. LITERATURE REVIEW	9
2.1. Comprehensive Field Evaluation of Asphalt Patching Methods and Development of Simple Decision Trees and a Best Practices Manual, University of Minnesota	9
2.2. Best Practice Guide for the Selection of Pothole Repair Options, Road Note 44, Scottish Roads Research Board	15
2.3. Pothole Identification, Assessment and Repair Guidelines, Communities of Tomorrow, Leveraged Municipal Innovation Fund.....	17
2.4. Asphalt Concrete Patching Material Evaluation, SR 548	17
2.5. Materials and Procedures for Repair of Potholes in Asphalt-Surfaced Pavements, Manual of Practice, National Research.....	17
2.6. NCHRP Synthesis 463, Pavement Patching Practices	18
2.7. Prevention and a Better Cure – Pothole Review	18
2.8. Reference Manual of Pavement Preservation Treatments	19
2.9. Pothole – Durable Pothole Repairs, ERA Net Road.....	19
3. AGENCY SURVEY	23
3.1. What is the Primary Cause of Pothole Development?	23
3.2. Has Climate Change Impacted the Frequency and Severity of Potholes?	24
3.3. What Materials do you use for Pothole Repair and are they Effective?	24
3.4. Does your Agency use Specialized Equipment for Pothole Repairs and is it Effective?	25
3.5. Pothole Repair Techniques	25
3.6. Pothole Repair Failure	25
3.7. New Developments	26
4. PAVEMENT PRESERVATION AND MAINTENANCE.....	27
4.1. Leading Causes of Potholes	28
4.2. Pothole Identification Flowchart	36

5. PATCHING MATERIALS	37
5.1. Tack Coat	37
5.2. Cold Applied Asphalt – Generic	37
5.3. Cold Applied Asphalt – Proprietary.....	39
5.4. Cold Applied Asphalt – Water-Setting	39
5.5. Cold Applied Asphalt – Resin-Based Mixtures	40
5.6. Hot Mix Asphalt – Generic	40
5.7. Hot Mix Asphalt – Special	41
5.8. Concrete and Hydraulically Bound Mixtures	41
5.9. SPRAY PATCHING MATERIALS.....	42
5.10. Other Specialty Products	42
5.11. Aggregate Gradations	43
5.12. Material Handling and Storage	44
6. LABORATORY TESTING FOR PRODUCT ACCEPTANCE AND QUALITY ASSURANCE	45
6.1. Gradation and Asphalt Cement Content	46
6.2. Stability	46
6.3. Cohesion	46
6.4. Wheel-Track Rutting	47
7. EQUIPMENT AND TECHNIQUES	49
7.1. Pothole Repair Management.....	49
7.2. Traffic Control and Work zone Safety.....	50
7.3. Equipment and Techniques	50
7.3.1. Hot Box	50
7.3.2. Automated Pothole Repair Unit	52
7.3.3. Spray Patcher	53
7.3.4. Infrared	56
7.4. Pothole Repair Techniques	57
7.4.1. Throw-and-Go and Throw-and-Roll	57
7.4.2. Semi-Permanent	58
7.4.3. Spray Patching	60
7.4.4. Infrared	60
8. EVALUATION OF NEW METHODS AND TECHNIQUES	65
8.1. Preliminary Performance Assessment.....	65
8.2. Laboratory Evaluation.....	65
8.3. Field Evaluation.....	66

8.4. Benefit-Cost Analysis66

 8.4.1. Cost-effectiveness Worksheet66

 8.4.2. Worksheet Element Definitions.....68

 8.4.3. Determination of Cost-Effectiveness Inputs69

9. BEST PRACTICES 71

 9.1. Temporary Repair71

 9.2. Semi-Permanent Repair71

10. RECOMMENDATIONS..... 73

 10.1. Public Communication73

 10.2. Pothole Repair Guidelines73

 10.3. Performance Measurement74

 10.4. Prevention, Maintenance and Preservation74

 10.5. Training75

11. ACRONYMS AND ABBREVIATIONS 77

12. REFERENCES..... 79

APPENDIX – REFERENCES SUMMARY 81
