

TABLE OF CONTENTS

Executive Summary.....	iii
Table of Contents.....	vii
1. INTRODUCTION.....	1
1.1 Scope and Limitations of this Guide	1
2. OVERVIEW OF MSE WALLS	3
2.1 Brief History	3
2.2 MSE Walls vs Reinforced Soil Slopes.....	3
2.3 Brief Overview of Mechanically Stabilized Earth Theory.....	3
2.4 MSE Wall Types and Components	4
3. ROLES AND RESPONSIBILITIES	13
3.1 The Traditional Retaining Wall Case	13
3.2 Participating Stakeholders and Their Responsibilities.....	14
3.3 Suggested Organizational Structures for MSE Project Delivery.....	35
4. MSE WALL APPLICATIONS.....	41
4.1 Typical Applications	41
4.2 Performance of MSE Walls	51
4.3 Durability and Selection of Soil Reinforcements	52
4.4 Drainage	54
4.5 Embedment Depth.....	54
4.6 Guidelines to Achieve Design Service Life According To CHBDC	55
4.7 Sustainability.....	55
5. DESIGN	57
5.1 Discussion of Design Codes Used in Canada.....	57
5.2 Basic Design Concepts.....	60
5.3 Site Investigation.....	67
5.4 MSE Walls and Abutments.....	70
5.5 Foundation of facing panels for Two-stage Wall Construction	73
5.6 Connection Capacity	74
5.7 Performance Criteria (Deformations).....	74
5.8 Reinforced Soil Zone	79

5.9	Drainage: Surface, Sub-surface and Internal	82
5.10	Seismic Design.....	90
6.	CONSTRUCTION	91
6.1	Summer and Winter Construction of MSE Walls.....	91
6.2	Reinforced Soil Placement and Compaction.....	97
6.3	Temporary Drainage	99
7.	QA AND QC OF MSE WALLS	101
7.1	Construction Quality Assurance.....	101
7.2	Construction Quality Control	102
7.3	Materials Quality Assurance	102
7.4	Inspection and Maintenance of MSE Walls	104
8.	LESSONS LEARNED	111
8.1	Galvanizing Testing on Bends to Mitigate Embrittlement.....	111
8.2	Example of Integrating Barriers into MSE Walls	112
8.3	Examples of Design Considerations for Construction Tolerances	113
8.4	Examples of QA/QC Non-compliance, Consequences and Outcomes.....	116
8.5	Examples of Post-construction Distresses, Consequences and Outcomes	118
9.	GLOSSARY.....	119
